Medical-K

GoodHealthPulse™

Medical Knowledge sharing Services for Doctors

Medical-K stands for latest research in Medical Knowledge.

You got no opportunity to study medicine at the Harvard Medical College of the Harvard University or such other leading university in the world.

But now you can continue learning with Harvard and other such great institutions.

Undeniably and essentially, a practising doctor is a learning doctor.

Introducing **Medical-K** .

Subscribe to **Medical-K** and at the click of the mouse access latest knowledge generated by their latest research.

Medical-K is a unique knowledge sharing service for doctors offered as an annual subscription service.

KnowledgeFountain, a leading Knowledge Management solution provider offers practising doctors **Medical-K** as a vital knowledge resource. This is a remarkable opportunity to keep their finger on the pulse of latest medical knowledge from diverse domains from leading institutions.

What is **Medical-K**

In leading institutions of medicine and research critical knowledge is continually generated. Best practises and procedures are continually perfected by their experts. This knowledge can add a new dimension to the performance of practising doctors. These institutions create and disseminate best practises. Practising doctors like you are understandably so busy that they can hardly find time access these new knowledge and benefit from it.

Why subscribe to **Medical-K**

A practising doctor is a learning doctor. Latest research, best practises, experience sharing by colleagues, new insights, and experiences can always enrich doctors both personally and professionally. Due to being already hard pressed for time due their ever hectic life many doctors cannot find time to access all these latest

How the subscribers benefit?

It pays to be updated on latest development in diagnostics and treatment. Subscribers can access in succinct words summaries of research works, latest developments in the world of medicine reported by leading universities like Harvard, Stanford, Yale, Berkeley, Oxford, Cambridge, Tufts to name a few. Resources are sourced from World Health Organisation and other UN bodies. This affords them the opportunity of continual learning from the best people in the world of medicine.

Subscriber's privilege

FREE admission to certificate course worth Rs. 9500 in

Climate Change and Healthcare Challenges - A Distance Education Program for Doctors

Inescapably, Doctors have to be at the forefront whenever any disaster strikes. The peril of Corona Virus amply demonstrated that. They have an ever expanding role to play in disaster management.

Doctors have to become "Thought Leaders" and actively contribute to public policy making.

Climate Change is real and poses a grave existential threat to mankind. Climate change is a cause of many health related emergencies.

It is incumbent on doctors to understand climate change thoroughly and become a thought leader for public health policy making. This unique program gives participants' a 360 degree view of climate change and the healthcare challenges it poses at larger levels (both micro and macro). It builds their knowledge and understanding to devise right strategy to respond at their level. With this program Doctors will be able to play a proactive role in sensitizing and educating people for corrective behaviour, etc.

This certificate program aims at giving a solid scientific grounding in climate change phenomenon and the challenges it poses to healthcare. It imparts knowledge and skills to handle the disaster management issues related to health care emergencies due to climate change.
